100/1000BASE-T1 Media Converter MATEnet

Fast/Gigabit Automotive Ethernet to Standard Ethernet converter with advanced features

FEATURES

- Automotive Ethernet to Standard Ethernet conversion
- 1000BASE-T1 and 100BASE-T1 support
- TE MATEnet connector
- Speed auto-negotiation or manual selection
- Master/slave auto-negotiation or manual selection
- IEEE and Legacy mode
- Frame generator mode
- USB for configuration, status and port diagnostic
- Can be used as a USB to CAN(/FD) interface
- USB or externally powered
- Aluminium enclosure
- DIN rail mounting possibility

The 100/1000BASE-T1 Media Converter MATEnet establishes a point-to-point link between the Automotive Ethernet and Standard Ethernet, supports both 100 Mbit and 1000 Mbit speeds, and features the TE MATEnet connector.

The media converter realizes a full-duplex physical-layer conversion between 1000BASE-T1 and 1000BASE-T (Gigabit Ethernet), or 100BASE-T1 and 100BASE-TX (Fast Ethernet) networks, and features TE MATEnet and RJ-45 connectors. Communication speed and master/slave settings can be auto-negotiated with a link partner or set manually by the user.

The device offers advanced features such as frame generator, cable diagnostic, as well as a possibility to be used as a USB to CAN(/FD) interface simultaneously with the media conversion function.

An open communication protocol over USB or CAN(/FD), which allows to read status information and configure port parameters, enables to easily integrate the converter into any system. The user can programmatically configure the device. A free-of-charge PC application is available to visualise the device's status, configure its parameters and use the advanced functions.

The media converter is an ideal tool for connecting a 100BASE-T1 or 1000BASE-T1 ECU into a computer or a laptop. The in-built status LEDs and dip switches allow to easily use the converter without a PC.
